Persona Analysis & Value Proposition Canvas

Performance led premium driving experience

INM310_SAHIL

Target Audience & Core Problem

Target Audience

Demographic
» Age: 30–45
» Income: $120,000+ annually
» Urban professionals

Psychographic
» Values performance, precision, and control
» Sees car as a symbol of achievement
» Enjoys premium experiences

Behavioral
» Research driven before purchasing
» Loyal to premium automotive brands

Core Problems

» Many luxury cars focus more on comfort than driving performance.

» Vehicles feel disconnected or lack driving excitement.

» Overloaded technology reduces real driver control.

» Difficulty finding a car that balances status, power, and everyday practicality.

Ryan

Senior Strategy Consultant | Downtown Toronto | Income: $160,000 | Age: 38

Ryan is a senior strategy consultant working with multinational clients in a fast paced, detail driven environment. He values products that feel controlled, refined, and intentional. Driving is one of the few moments in his day that feels truly personal.

He sees his car as an extension of his discipline and taste, appreciating precision and performance on early morning and late night drives. Brand loyal and research driven, he expects excellence without unnecessary flash. On weekends, he enjoys long drives, premium coffee, staying active, and following automotive innovation.

LIKES

» Precision engineering
» Smooth, responsive driving
» Premium interiors
» Long highway drives

MOTIVATION

» Feeling in control behind the wheel
» Owning products that reflect success
» Enjoying driving, not just commuting

VALUES

» Quality
» Performance
» Reliability
» Brand heritage

MEDIA HABITS

» YouTube
» LinkedIn
» Automotive websites & forums
» Brand websites before purchase

Value Proposition Canvas (Customer Perspective

BMW Value Perspective

Products & Services

» Performance sedans and luxury SUVs
